HALLENSCHEID & McDONALD

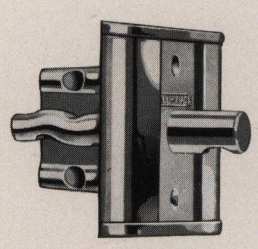
The 200 Line on pages 2 and 3 is abreast of the best trend in current design. Simple, functional, with an individuality that sets it apart from all other lines of accessories, it has been an overnight success. The design is protected by design patents.

All Aristocrome pieces and parts are made of solid brass, polished to a mirror-like surface, nickel plated and then heavily chromium plated. Projecting pieces are forged from rod brass. This process produces a very much closer grained and denser metal than sand casting. The denser metal takes a higher polish and gives a more brilliant and beautiful chromium finish than ordinary castings.

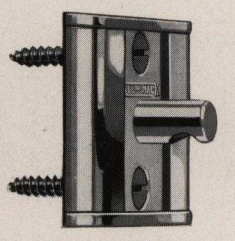
Recessed shells are drawn seamless from heavy rolled sheets of brass. The flange of all recessed pieces is integral with the body, eliminating any possibility of cracks opening between the flange and the body of the fixture. 200 Line fixtures are fully recessed, without any projecting lips or ears.

THE PATENTED ARISTOCROME LOCKING DEVICE

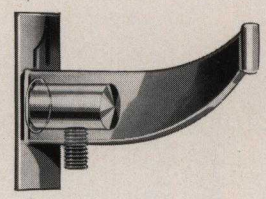
U. S. PATENT NO. 1,989,329



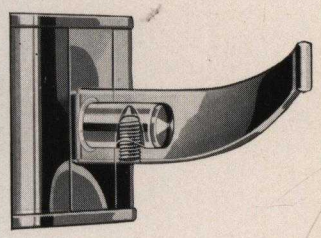
"L" Base Plate
Installed by setting in cement.



"S" Base Plate
Installed with screws or toggle bolts.



Projecting Part



Complete Fixture

EXCLUSIVE FEATURES: The base of the fixture is fastened directly and tightly to the wall. The projecting part is **locked to the base plate.** It does not depend for security upon pressure against a wall, but has a definite metal to metal lock against the base itself. The projecting part fits accurately into the patented recessed panel of the wall plate. This conceals the installing screws of the "S" type fixture and prevents any possibility of sidewise movement. In the "L" type the base of the fixture is integral with the cement lug. The lug is not screwed, soldered, or welded on, but is forged in one piece with the wall plate. After installation the two types are identical in outward appearance.

If fixtures are to be installed by setting in cement add "L" to catalog number.

CLEVELAND LIBRARY PUBLIC

The 300 Line, on pages 4 and 5, within a few years achieved the largest national sale of all high-grade chrome accessories. The outstanding success of these fixtures has attracted many imitators, who have not, however, been able to imitate the patented Aristocrome locking device nor the superb design and finish of the Hall-Mack craftsmen.

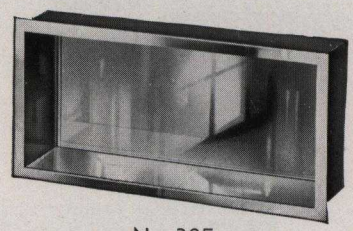
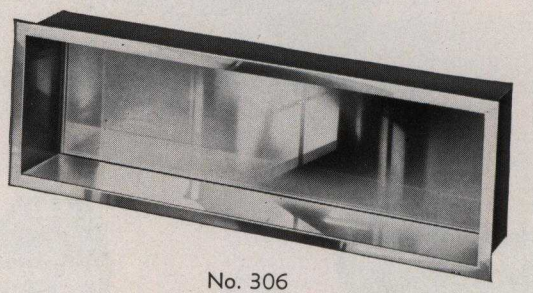
RECESS MIRROR SHELVES

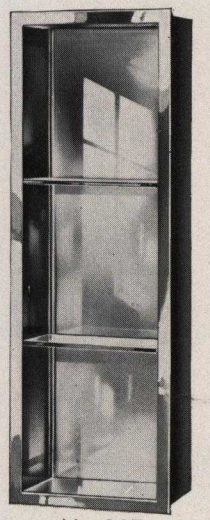
No. 307
(Toiletries not included)



No. 305



No. 306



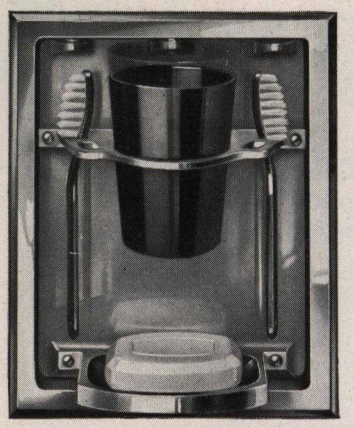
No. 307

No.	Wall Opening	Overall of Chromium Plated Flange	Usually Installed	Installed by Wood Screws
305	17¼"x8½"x4½"	17¾"x9"	Over lavatory	Through sides
306	25½"x8½"x4½"	26"x9"	Over bathtub	Through sides
307	8⅜"x25½"x4½"	8¾"x26"	At sides of cabinet or where desired	Through sides

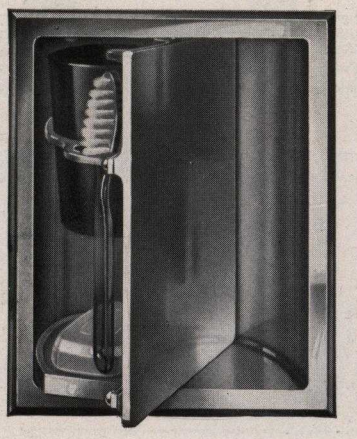
One or more of the mirrored shelves above will add strikingly modern beauty to any bathroom. Their decorative value as well as their utility in holding miscellaneous toiletries cannot be exaggerated. No. 307 is shown twice to suggest its use as a pair, one on either side of the medicine cabinet. It is just as striking used singly wherever a decorative and colorful niche is desired.

CONCEALED LAVATORY UNIT

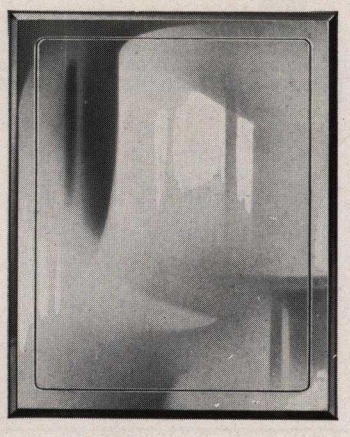
U. S. Patent No. 2,039,065



No. 338—Open
Soap Dish, Tumbler and Tooth Brush Holder exposed for use.



No. 338—Turning
Turned at the touch of a finger.



No. 338—Closed
Tooth Brushes, Soap and Tumbler hidden from sight

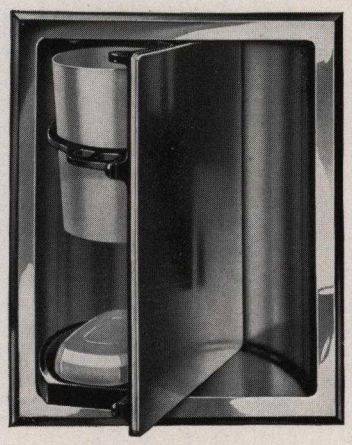
An outstanding feature of the Hall-Mack line. One fixture takes the place of three. Soap holder, tumbler holder, and tooth brush holder are on a solid brass chromium plated panel which revolves so as to entirely conceal these necessary utilities when not in use. Panel revolves in seamless chromium plated brass housing. A new low priced design, No. 337, is shown below.

Wall opening for both models: 6½"x8"x3½".
Size overall of flange, both models: 7⅜"x8⅝".

Both designs are made in two types: "L" type, installed by setting in cement. "S" type installed by wood screws through sides. Wood buck must be provided at either side of opening to take screws. Specify type when ordering.

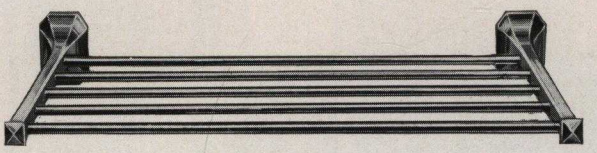
TUMBLERS OF SHATTERPROOF BLACK PLASTIC CAN BE FURNISHED FOR THIS UNIT IF DESIRED

At right, No. 337—Chromium plated brass housing, with black bakelite revolving unit. Smooth side of revolving panel completely covered by chromium plated sheet brass. When closed, appearance is very similar to all-chrome fixture above.



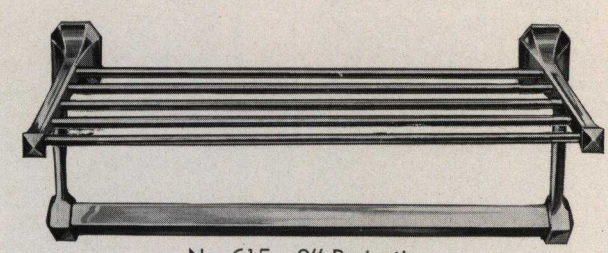
No. 337—Turning

TOWEL SUPPLY SHELVES



No. 610—9" Projection

Solid, Cast Brass Brackets. Five cross bars. "S" Type for concealed screw or toggle bolt installation. "L" Type for cement installation.



No. 615—9" Projection

Solid, Cast Brass Brackets. Five cross bars for towel supply. 7/8" square chrome bar below. "S" Type for concealed screw or toggle bolt installation. "L" Type for cement installation.

STANDARD LENGTHS OF TOWEL SHELVES: 18", 24", 30".

COLORCROME FORGED BRASS ACCESSORIES

HALL-MACK

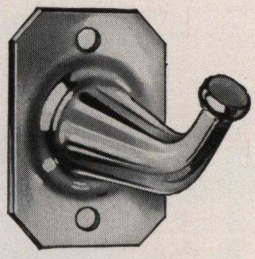
CATALOG NO. 40

HALLENSCHEID & McDONALD

THE FIXTURE

Colorcrome Accessories are forged from solid brass, modernly styled, beautifully chromium plated and **moderately priced.**

Colorcrome Accessories are designed so that they may be used either without color plates as an all-chrome installation, or with color plates as explained below to give a color accent that greatly enhances the beauty of the chrome fixture and permits of a wide variety of striking effects in the bathroom.

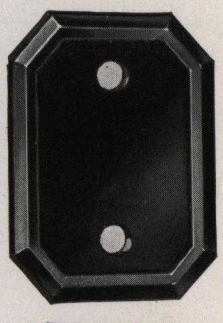


THE COLOR PLATE

U. S. Patent No. 1,989,329

Colorcrome Plates are specifically designed for use with Colorcrome Accessories. Made from sanitary everlasting Plastic, this color plate achieves in connection with the chromium fixture strikingly beautiful color accents. It will not chip, fade, stain or crack.

Color plates may be ordered either with fixtures or separately. Standard Colors: Black, White, Green, Ivory, Persian Brown, Blue, Red, Fawn, Peach, and Chrome.



THE COMBINATION

The assembly of fixture and color plate is very simply made when fixtures are being installed. Cross-cut rosette-head installing screws pass through both fixture and color plate which are maintained in exact position by the patented recessed panel in the color plate. In ordering Colorcrome fixtures with color accent add to catalog number the color desired.

Thus: No. 481 specifies chromium robe hook without color plate.
No. 481 Black specifies chromium robe hook with black plate.

METROPOLITAN CHROME PLATED ACCESSORIES

HALL-MACK

CATALOG NO. 40

HALLENSCHEID & McDONALD

GLEAMING, MODERN BEAUTY AT LOW COST

Metropolitan Bathroom Accessories are the last word in beautifully styled chromium plated fixtures at a low price. They are designed in the modern manner, without being extreme. Surface fixtures are die cast in one piece of solid Zamak metal, giving a strength, rigidity and massive beauty not possible with fixtures made by bending and clinching thin gauge sheet metal.

Recessed fixtures have chrome plated brass shell, with chrome plated die cast Zamak soap lip and ears for grab bar and roller.

Metropolitan fixtures make possible the use of the very newest chromium plated bathroom trim in jobs where cost is an important factor. For modernizing old bathrooms, one of the most striking changes that can be made is to replace the old style obsolete accessories with new, gleaming, chromium plated fixtures of modern design. This change can now be made economically, as Metropolitan fixtures cost very little.

CHINAVOGUE VITREOUS CHINA ACCESSORIES

HALL-MACK

CATALOG NO. 40

HALLENSCHEID & McDONALD

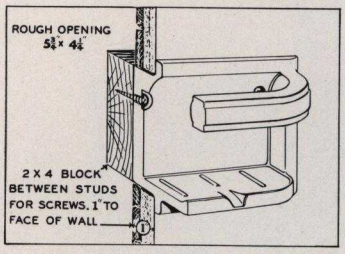
SMART MODERN DESIGN. ChinaVogue accessories are smartly styled. They are not heavy and clumsy in appearance, but streamlined, in harmony with the best current trend. ChinaVogue fixtures bring Hall-Mack modern styling into the very lowest priced field.

COMPLETE DESIGN HARMONY. ChinaVogue design is carried throughout every piece in the line. Any combination of fixtures selected from the ChinaVogue line will make a perfectly matched harmonizing set.

LOW COST. ChinaVogue accessories are low priced. A complete set of five pieces of surface attached type costs less than two dollars.

COLORS. All surface attached fixtures are carried in stock in white, black, and ivory. The recessed paper holder and soap and grab are stocked in white and black only. In addition to stock colors, ChinaVogue accessories can be furnished on order to match any special color or shade.

INSTALLATION. The surface attached fixtures are easily installed by means of a wedge-shaped metal plate which is screwed to the wall. A slot in the back of the fixture fits down over this plate, concealing the screw-heads and giving the fixture a built-in appearance.



The recessed paper holder and soap and grab are installed by screws through the back of the fixture. The location of the screws makes them practically invisible after installation. Wall opening of 5¾"x4¼"x1" must have backing to take wood screws or toggle bolts.

Recess: 5¾"x4¼"x1". Flange: 6½"x5".

NEW MODERN BEAUTY. ChinaVogue cement-in accessories have been created to get away from the old-fashioned square shapes which have been used for so many years in the past. A complete harmony of modern design runs through the entire line. Every piece carries the same matching style that definitely links it to every other piece. The result in the completed bathroom is a harmonizing beauty impossible to achieve heretofore in china accessories.

COLORS. ChinaVogue cement-in fixtures are stocked in white and black. They can also be furnished on order in any matching color or shade.

LOW COST. China fixtures are the most economical accessories for the modern bathroom. ChinaVogue accessories cost no more than ordinary china. You do not pay a premium for Hall-Mack styling.

LOW INSTALLATION COST. ChinaVogue fixtures are easier, and therefore cheaper, to install than ordinary fixtures. The labor of exact and careful fitting into the wall has been eliminated. All ChinaVogue fixtures are flange type fixtures—either recess flange type or dowel flange type. This permits making a quick rough opening, as the edges will be covered by the flange of the fixture.

ChinaVogue fixtures require only 1" recess into the wall. They can be installed in tile without cutting into the metal lath. The flange design makes every ChinaVogue fixture usable with any size or shape of tile. They are equally well suited for installing in marble, glass, wallboard, or any other type of wall facing. Installation cost is a very considerable part of the total cost of cement-in china fixtures. ChinaVogue saves you money on the installation.

HALL-MACK SEAMLESS MEDICINE CABINETS

HALL-MACK

CATALOG NO. 40

HALLENSCHEID & McDONALD

SEAMLESS CABINETS

Every Hall-Mack cabinet is made without a single seam. Drawn on a huge press from one sheet of heavy steel, the cabinet is formed complete in this operation. There is absolutely no clinching, crimping, spot-welding, soldering or gas welding. Hall-Mack seamless medicine cabinets are offered in every price range—from the finest cabinets made, to the most economical.

SERIES "P" cabinets, illustrated on pages 28 to 30, have vitreous porcelain interiors, the lifetime finish which Hall-Mack pioneered and perfected. This is the same finish as on a bath tub or lavatory. It can be thoroughly cleaned with a damp cloth and will last indefinitely. Every construction detail is in keeping with this fine porcelain interior. Hall-Mack porcelain cabinets are priced no higher than better-grade enameled cabinets of competitive lines.

SERIES "A," illustrated on pages 31 to 33, offers a high-grade baked enamel line for jobs requiring cabinets lower in price than Series "P." The seamless bodies are finished in oven-baked Dulux enamel. Glass shelves are fully adjustable. Doors, hung on continuous hinge, have either chrome-plated brass binding or beveled-edge mirrors.

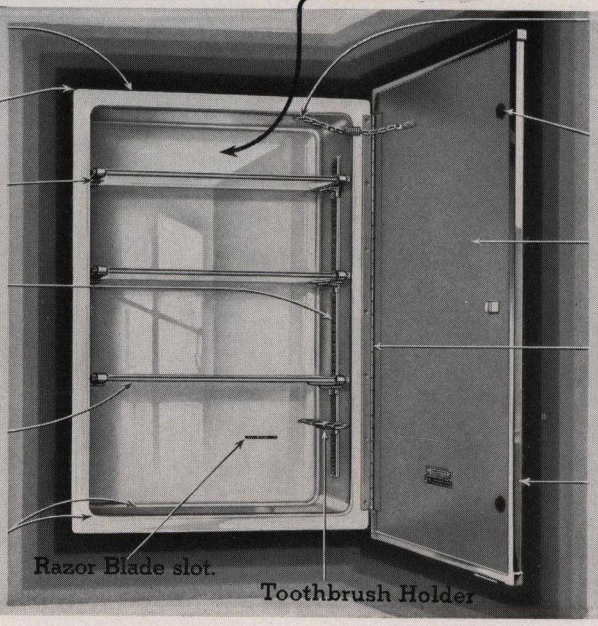
SERIES "F" cabinets on page 34 are low-priced cabinets. Low price has been achieved without sacrificing substantial construction or attractive appearance.

SERIES "CR" cabinets on page 35 are low-priced cabinets similar to Series "F" in design and construction, but fitted with first-quality crystal mirrors.

WALL MIRRORS

Many of the cabinet mirror designs can be furnished as wall mirrors, complete with steel back and concealed hanger. Consult price list for numbers available. In ordering wall mirrors, add "M" to cabinet number.

SEAMLESS *Porcelain* INTERIOR

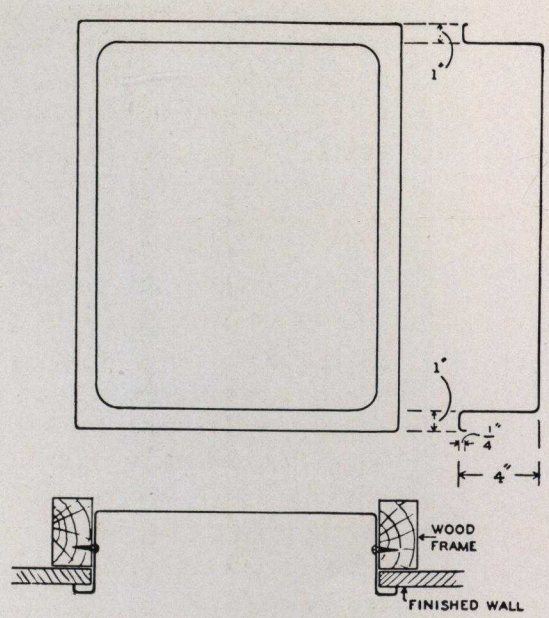


Flange rests flush on wall for wall-mirror appearance
Reinforced edge.
Curved end shelf bracket holds shelf in place.
Chrome-plated shelf strip permitting one-half inch up and down adjustment on shelves.
Heavy bulb edge glass shelves. 2 with cabinets of 14" x 20" wall opening; 3 with all others.
Seamless one-piece box with rounded corners cannot catch dirt.
Razor Blade slot.
Toothbrush Holder
Improved spring door check and stop.
Thick rubber cushion for silent closing.
Heavy steel door rust-proofed with aluminum.
Continuous one-piece piano hinge welded to door.
A modern styled heavy brass chrome channel frame around all four sides eliminating mirror breakage.

INSTALLATION

All Hall-Mack Seamless Cabinets should be installed **after** the walls are completely finished. Installation is by four wood screws through the sides of the recessed case.

Leave wall opening of size indicated in catalog. Finish wall level to edge of opening. Tile not flush with plaster line must either completely surround the wall opening or may be dropped below opening, keeping 2" or more away from wall opening at all points.



ROUND CABINETS

To facilitate the installation of Hall-Mack Circular Cabinets (page 29), four curved wood blocks are furnished free, and packed with each cabinet. To use these blocks, simply make a wall opening 20½" square, and nail a block in each corner before lathing. Finish wall to edge of circular opening created by the blocks.

ELECTRICAL INSTALLATION FOR LIGHT CABINETS

All Hall-Mack light cabinets bear the approval label of Underwriters' Laboratories, Inc.

AT TOP

The last word in smart facial illumination—without glare or shadow. A pillar of light at each side behind curved opal glass. Mirror has sprayed copper backing and is guaranteed against silver spoilage. Door and light fixtures completely trimmed with brass, beautifully chromium plated. Has light switch and convenience outlet. Four 40-watt T8 frosted lamps not included, but can be furnished.

See page 26 for details of seamless porcelain cabinet.

AT LEFT

Illuminated vanity wing cabinet. Light comes through wing mirrors to give perfect facial illumination. Heavy continuous hinges of chromium plated brass permit wing adjustment for front, side, or rear view. A masterpiece of durable construction and smart design. Four 25-watt T-10 frosted lamps not included, but can be furnished.

AT TOP

A mirror door with conservative formed top of simple and pleasing design. Copper backed mirror is completely bound with chromium plated brass channel and door is hung on heavy continuous hinge. See page 26 for details of seamless porcelain cabinet.

AT LEFT

The etched and beveled Venetian mirror is mounted with polished monel metal clips to eliminate unsightly rosettes and drilling holes which weaken the glass. Mirror guaranteed against silver spoilage. See page 26 for full details of the seamless porcelain cabinet.

THE LIGHT MOVES WITH THE DOOR

You can swing this door open to bring the mirror close to the face and the lights move with it. They are always in position for perfect facial illumination. The seamless cabinet is finished in oven baked Dulux enamel. Bulb edge glass shelves are fully adjustable. Metal trim at either side of mirror is brass, beautifully chromium plated. There is a convenience outlet in the cabinet for electric appliances. The two 18" 60-watt Lumiline bulbs are not included, but can be furnished.

The rotating chrome shades (No. SH-18) to control light are extra equipment and must be ordered separately. Similar shades, shown on page 36, can be furnished for any Hall-Mack Lumiline Light Cabinet.

A smart, distinctive and practical light cabinet at a moderate price.

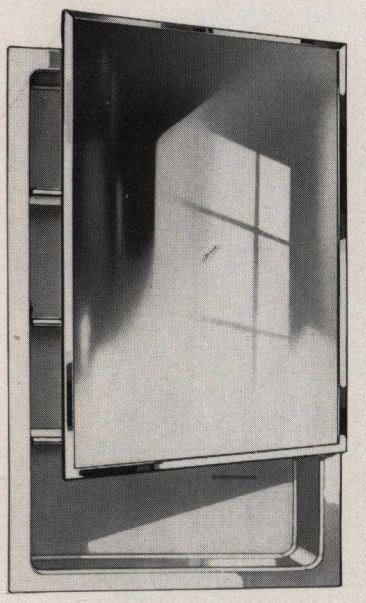
SEAMLESS HOTEL CABINETS WITH CHROME FRAME DOORS



AT RIGHT

The ideal hotel cabinet. The seamless porcelain finish of No. P1618C will last indefinitely. Rounded corners facilitate cleaning. Adjustable bulb edge glass shelves. Razor blade slot. Chromium plated brass channel frame around door adds smartness and protects glass. Sprayed copper backed mirror guaranteed against silver spoilage. No. A1618C cabinet is identical except finished in baked Dulux enamel instead of porcelain, to permit lower price.

AT LEFT

A smart and practical hotel cabinet at a lower price. Seamless cabinet finished in oven baked Dulux enamel. Bulb edge glass shelves. Razor blade slot. Chromium plated frame on three sides of mirror is integral with door. Door hung on continuous hinge. Sprayed copper backed plate glass mirror guaranteed against silver spoilage. This cabinet can also be furnished on special order with crystal mirror instead of plate, or with silvertone mirror frame instead of chromium. Prices on request.

A1618C		16"x18"	14"x24"x4"	27 lbs.

Any hotel cabinet can be made up, on special order, with Lumiline light fixture at top or sides. Prices on request.

SERIES "A" cabinets illustrated on this and the opposite page offer a high-grade baked enamel line at a very moderate price. Box construction of Series "A" is identical with porcelain detail on page 26, except that the finish is baked Dulux enamel instead of fired vitreous porcelain. All Series "A" bodies are drawn seamless from one piece of steel without clinching, soldering, or welding. Bulb edge glass shelves are fully adjustable, and held firmly in place by curved end brackets. Each cabinet has a razor blade slot and a toothbrush holder. All mirrors have sprayed copper backing and are guaranteed against silver spoilage. Doors are hung on heavy continuous hinge and have cushion spring stop. Chrome frames are made from a single piece of solid brass channel, beautifully chromium plated.
